Professional Summary

Frontend developer with hands-on experience building responsive, user-friendly web interfaces using HTML, CSS, Tailwind, JavaScript, and React. Experienced in working with APIs, routing, and modern UI components. Looking for an opportunity where I can contribute to real projects and grow through practical learning.

Skills

- **Languages:** HTML5, CSS3, JavaScript (ES6+)
- **Frameworks/Libraries:** React.js
- **Styling:** Tailwind CSS, Bootstrap
- **Tools:** Git, GitHub, VS Code, Chrome DevTools, Figma
- **Others:** REST API Integration, Firebase Auth, Responsive Design
- **Interpersonal Skills:** Problem-solving, debugging, UI/UX expertise, and strong teamwork & collaboration skills

Projects

1. Job Portal

A modern job portal built with React and Node.js that connects job seekers with employers through a smooth and responsive user experience. Includes authentication, job posting, application tracking, and role-based access control.

- Built a dynamic job listing platform with React and REST APIs for real-time job data rendering
- Implemented secure user authentication and role-based access
- Developed job posting, application submission, and application tracking system
- Designed a fully responsive and clean UI using Tailwind CSS for a better user experience
- [Live Link](#) | [Client Code](#) | [Server Code](#)

2. News Portal

A React-based news portal with category filtering, Firebase authentication, protected routes, and a responsive Tailwind UI.

- Built an interactive web app with dynamic data rendering

- Integrated APIs for news suggestions.
- Designed a clean and user-friendly UI
- [Live Link](#) | [Client Code](#)

3. Book Vibe

A responsive web application for discovering, searching, and exploring books with a modern and user-friendly interface.

- Built a dynamic book browsing platform with React and API integration for book data
- Designed a clean, responsive UI using Tailwind CSS for an engaging reading discovery experience
- Optimized performance and user experience with reusable components and efficient state management
- [Live Link](#) | [Client Code](#)

4. PH Tube

A JavaScript-based video browsing platform that dynamically loads videos from an API with search, category filtering, and sorting features. Built with a responsive Tailwind CSS interface for a smooth user experience.

- Developed a dynamic video-sharing web application with API-based data rendering
- Implemented category filtering, search functionality, and sorting features
- Designed a responsive and clean UI using Tailwind CSS
- [Live Link](#) | [Client Code](#)

Education

Bachelor of Science (BSc) in Computer Science & Engineering
Daffodil International University
Year: 2022 - 2025
